General Tips:

- Act how you would act for a real ED patient, talk to the “patient”, “consultant”, etc as if they were real
- Instructors are not trying to trick you but rather determine your skill at taking care of sick patients; take the hint if they are leading you in a different direction, stand your ground if you know you are right
- Immediately address/treat unstable vitals or any abnormal results; Treat pain
- Don't forget to do GU or Rectal exams when appropriate; Expose/examine all skin
- Prep and use the provided Note Sheet to prompt key actions, remind you of case strategy, note your differential diagnosis and record any key case info or critical actions
- You can ask quick questions about the oral boards process during the case but save any content or management related questions until the case is finished
