Localize the symptoms
Skin/external exam, palpate testes, check for hernias

**Testes**
- Get an ultrasound with Doppler
  - Torsion? Traumatic rupture?
  - Consult urology

**Epididymis**
- Torsion of appendix testis? Epididymitis or epididymo-orchitis? Simple contusion or hematoma?
- Home with NSAIDs/ice (+ abx per CDC recommendations if epididymitis or epididymo-orchitis)

**Spermatic Cord**
- Check for hernia
  - Non-reducible? Dusky overlying skin? Inability to pass BM./flatus? Vomiting?
  - Consult general surgery

**Skin/Scrotum**
- Check for red flags concerning for Fournier’s gangrene
  - Palpable crepitus
  - H/o DM
  - Fever, rigors, high CRP/glucose/WBC
  - Consult urology and general surgery
